

A Box Overview

Box Business and Enterprise Plan Comparison

“ What’s great about Box is that it keeps great records of everything that’s going on, I can control who has access to what and I have complete transparency of every file. ”

James Bambauer
Director of
Information Technology,
Eveo

Integrating >>> Projects & Technology

Over 100,000 businesses turn to Box for simple, secure content sharing. Box offers multiple service levels to best fit the needs of any size business... from 5 employees to 5,000.

While Box Business and Box Enterprise both provide the same core set of functionality and security features, Box Enterprise has an additional suite of features that appeal to specific content-sharing use cases.

To better help you decide which plan is right for your company, here’s a brief overview that explains the advanced features of Box Enterprise.

Why Box Enterprise?

Additional Services

- **Full Custom Branding:** Box Enterprise offers full custom branding of your Box account, providing internal teams and external collaborators with a professional, customized look and feel.
- **Dedicated Support:** 24/7 phone and email support from a dedicated Box account manager.
- **Unlimited storage:** Store any and all of your content on the Box platform for access anytime, anywhere.

Security

- **Encryption at Rest:** Box Enterprise offers both 256-bit SSL encryption for data in transit and 256-bit AES encryption for data at rest.
- **Bulk Add/Edit User Accounts:** Add multiple users at once via CSV file or provision accounts programmatically.
- **Enhanced Settings and Reporting:** Require minimum password strength, set maximum session length and pull detailed security reports.
- **Group-Based Access:** Efficiently make sure the right people have access to the right content by specifying access group by group.

Integrations

- **Salesforce.com Integration:** Box Enterprise integrates with this cloud CRM system to provide all of your Box content within the Salesforce.com application.
- **Single Sign-On:** Box’s Single Sign-On supports SAML 2.0 with providers like Ping, Okta, OneLogin, VMware Horizon and ADFS 2.0.
- **Mobile Device Management:** Provision and deprovision mobile access and wipe content off lost devices with Box partners Good Technology, MobileIron and AirWatch.
