
[Primavera P6 Application Administration Training Class -- 2 Day Course](#)

This course teaches you how to build enterprise data structures and configure settings to support an enterprise implementation or Cloud deployment. Expert instructors will teach you how to use Primavera Gateway to configure integrations between P6 and other applications.

By taking this course, you'll develop a deeper understanding of how to use Primavera P6 to benefit your business. Through in-person or online training, application administrators, program offices or core teams can learn how to more efficiently execute an enterprise implementation.

Audience: Administrators, Functional Implementers, Project Managers

Prerequisite: Must have taken Primavera P6 Fundamentals (Primavera P6 EPPM – Web-Based Software)
