
Primavera P6 Analytics Release 8.x 2 Day Course

This Primavera P6 Analytics Rel 8.x course is ideal for administrators and end-users using Primavera P6 Analytics (R1.2) with Primavera P6 R8.0 or R8.1. CBA instructors will teach you how to use P6 project management data to create basic requests, create filters, build views and charts in requests, build gauge views and pivot tables and create dashboards.

Explore Oracle BI Publisher and BI Deliver.

Oracle BI Publisher and BI Deliver are covered as well. This 2-day class concludes with a case study in which key functionality is reinforced. P6 Analytics is based on Oracle's Business Intelligence Enterprise Edition.
